Key Findings:

1. High Revenue Leakage from Order Cancellations:

=Overall cancellation rate is 14.21%.
=Approximately 18K orders were cancelled.
=Revenue leakage reached 8.80% of total revenue.
=Impact: Direct loss of potential revenue and operational costs.

2. Merchant Fulfillment Shows Higher Cancellation Rates:

Merchant-fulfilled orders have significantly higher cancellation rates than Amazon Fulfillment.
Impact: Fulfillment inefficiencies are contributing to revenue leakage.

3. Standard Shipping Has More Cancellations:

Standard shipping records a higher cancellation rate compared to expedited shipping.
Impact: Longer delivery expectations may increase order cancellations.

4. Unshipped Orders Are a Major Risk Area:

Most cancelled orders are associated with Unshipped courier status.
Impact: Delays before shipment are causing customer drop-offs.

5. Certain Product Categories Drive Most Revenue:

Categories such as Set, Kurta, and Western Dress contribute the highest revenue.
These categories also experience notable cancellation rates.
Impact: High-volume categories require closer monitoring.

6. Revenue Is Concentrated in a Few States:

Maharashtra, Karnataka, Telangana, Tamil Nadu, and Uttar Pradesh generate the largest share of revenue.
Impact: Regional performance varies significantly.

Promotions Show Mixed Effectiveness:

Some promotions generate high revenue but also higher cancellation rates.
Impact: Promotion quality is more important than promotion volume.

8. B2B Segment Contributes Minimal Revenue:

B2B revenue contribution is approximately 0.75%.
Impact: Business growth is heavily dependent on B2C customers.

Business Recommendations

Recommendation 1: Improve Fulfillment Operations:
Action:
- Shift more orders to Amazon Fulfillment.
- Monitor merchant fulfillment performance.

Expected Benefit:
- Lower cancellation rates.
- Better customer experience.

Recommendation 2: Reduce Unshipped Order Delays
Action:
- Improve warehouse processing time.
- Speed up courier assignment.

Expected Benefit:
- Fewer cancellations before dispatch.

Recommendation 3: Prioritize High-Performing Categories
Action:
- Increase inventory availability for Set, Kurta, and Western Dress categories.

Expected Benefit:
- Higher revenue generation.
- Reduced stockout risk.

Recommendation 4: Optimize Shipping Strategy
Action:
- Encourage expedited shipping for high-value orders.

Expected Benefit:
- Reduced customer cancellations.
- Improved delivery satisfaction.

Recommendation 5: Review Promotion Effectiveness
Action:
- Identify promotions with high cancellation rates
